

TECHNICAL SKILLS

SQL | Tableau | dbt | GitHub | Python | Salesforce (CRM) | Excel | Power BI | R

WORK EXPERIENCE

Lennar, Miami

Data Analyst II

July 2022 - Jan 2026

- Acted as the **primary point of contact between sales managers and executives**, translating business requests into actionable metrics and **solutions accepted by both ends**.
- Contributed to the development of data pipelines and reporting solutions for **AI driven conversation analysis**, resulting in a **25% improvement in quality scoring and organization wide adoption**.
- Designed, built, and maintained **Tableau dashboards** supporting users from floor sales representatives to executive leadership, **driving 5,000+ monthly views and delivering actionable KPIs on customer funnel performance**.
- **Optimized core Tableau dashboards, reducing load times by 66%**, while establishing standardized data structures to improve scalability and consistency across the reporting layer.
- Developed and maintained email dashboards integrating traditional **email KPIs with customer journey data**, overcoming Salesforce reporting limitations and enabling standardized, end-to-end performance visibility across divisions.

Allstate, Chicago

Data Analyst

Feb 2021 – July 2022

- Supported the States Team by responding to ad-hoc requests, leading to **gains of up to \$500K**.
- Supported agencies in Washington through regulatory changes. Provided analysis that **facilitated agencies to prioritize critical customers**.
- Utilized Python and Power BI to perform independent analysis that **reduced the decision-making timeline by 33%**.
- Created, modified, and automated Tableau dashboards capable of presenting the development of the business and allowing users to **identify the worst and best segmentations in our books**.
- Extracted, cleaned, and analyzed data (ETL process) to deliver thorough insights and presentations based on our client requests.

Coop Careers, San Francisco

Data Analytics Captain (nights, part-time)

Aug 2021 - Dec 2021

- Mentored recent graduates in SQL, Python, Tableau, and Excel to prepare them for entry-level data analytics roles.
- Managed a team of early-career professionals on their first client project.

Coop Careers, San Francisco

Intern

Aug 2020 - Dec 2020

- Apprenticeship focused on: SQL, Tableau, Google Analytics, and Excel.
- Analyzed bike-share dataset from Lyft 2017-2020. Identified trend and seasonal components. Forecasted the number of rides and determined an expected loss of at least 8 million dollars of revenue due to COVID-19.
- Constructed visualizations and proposed suggestions on Doordash rides dataset. Created dashboards capable of detecting malicious activity, beneficial for making deployment decisions, and explaining missing data.

EDUCATION

B.S. Statistics, University of California, Davis, CA
Minor: Computer Science

June 2019

LANGUAGES: English and Spanish
